

## Comic Strip #9

### HOW DOES YOUR EDIBLE GARDEN GROW?

WEEDS COMPETE WITH YOUR VEGETABLE PLANTS FOR SPACE, SUNLIGHT, NUTRIENTS AND WATER. DON'T IGNORE THEM! SO WEED AND BE MERRY!

**REMOVE WEEDS** WHEN THEY ARE SMALL BEFORE THEIR ROOTS BECOME ESTABLISHED.

**USE A MULCH** A COVER ABOUT 8-10 CM THICK BETWEEN THE ROWS AND PLANTS CAN BE MADE FROM MATERIALS SUCH AS BARK, COMPOST AND STRAW.

**WATER BEFORE WEEDING** OR WEED RIGHT AFTER IT HAS RAINED AS IT'S EASIER TO PULL OUT WEEDS FROM MOIST SOIL.

**PLANT • GROW • SHARE With Those in Need**

PLANT A ROW  
GROW A ROW
