

Free Compost Webinar on Wednesday May 1, 2013

Green Manitoba and the Compost Council of Canada invite you and your compost colleagues to participate in our May 1st webinar:

Fundamentals of Organics Recycling

As the first in our series of free organics recycling webinars, our inaugural session will be led by Scott Gamble of CH2M Hill, project manager for Environment Canada's recently released *Technical Document on Municipal Solid Waste Organics Processing*. Everyone interested in maximizing diversion and resource utilization is invited to attend.

Date: Wednesday May 1, 2013

Start Time: 12 Noon (Central Time)

Presentation with opportunity for Q&A discussion. Total time = 1 hour.

Cost: Free

The May 1st webinar will focus on:

- the relevance of organics recycling within overall waste diversion and resource utilization
- feedstocks: from selection to collection to processing
- technology options for organics recycling
- design and permitting considerations
- managing the process effectively
- compost marketing

Please register in advance by emailing Danielle Buklis at The Compost Council of Canada: info@compost.org, providing your contact info (name, organization, phone, email coordinates). Information on the connection process to participate in the May 1st webinar will then be forwarded.

We look forward to your participation.
