

HOW DOES YOUR EDIBLE GARDEN GROW?

growarow.org

SOAKING IT ALL IN THE GARDEN—HOW TO QUENCH YOUR PLANTS' THIRST...

WATER EARLY IN THE DAY TO AVOID EVAPORATION BY THE SUN'S HEAT, DIRECTING WATER TO PLANTS' ROOTS INSTEAD OF THEIR LEAVES.

TAKE ADVANTAGE OF RAINWATER. INSTALL A RAIN BARREL FOR SOME FREE REFRESHMENT FROM MOTHER NATURE.

REMOVE WEEDS SO THAT THEY DON'T COMPETE WITH YOUR PLANTS FOR WATER.

CONSERVE MOISTURE USE MULCH, BETWEEN THE ROWS AND AROUND PLANTS, PROVIDING A PHYSICAL BARRIER TO SLOW EVAPORATION.
