

HOW DOES YOUR EDIBLE GARDEN GROW?

growarow.org

LET'S BE FRIENDS... COMPANION PLANTING IN THE GARDEN.

THE COMBINATION OF DIFFERENT PLANTS IN THE GARDEN HELPS PROVIDE NATURAL PEST CONTROL AND IMPROVE CROP YIELD.

© VISIONS OF UTOPIA

MARIGOLDS WARD OFF PESTY INSECTS AND PROTECTS NEARBY PLANTS.

BEANS DRAW ENERGY FROM THE SUN AND CONVERT IT TO NITROGEN FOR THE SOIL AND PLANT ROOTS.

BASIL HELPS IMPROVE TOMATO GROWTH AND FLAVOUR.

SUNFLOWERS CAN PROVIDE SUPPORT FOR CLIMBING PLANTS AS WELL AS SHADE ROOTS AND ATTRACT APHIDS AWAY FROM OTHER PLANTS IN THE GARDEN
