

Join us to celebrate the 2025 Gardening Season and International Compost Awareness Week !

Food Gardening Matters

Sign up to learn about veggie-growing, the wonders of soil and compost and how to take care of the health of our planet.

Participate in our FREE! webinars featuring amazing down-to-earth experts:

Wednesday April 23rd @ 7pm Eastern

Presented by: Steven Biggs, www.FoodGardenLife.com

Choose Top Crops for Your Garden

Not sure what crops to grow? Pick top crops that suit your growing conditions, how much space you have — and that you'll enjoy eating and sharing. In this talk, get ideas for unusual crops, crops for challenging conditions and crops for small spaces.

Wednesday April 30th @ 7pm Eastern

Presented by: Glenn Munroe, The Compost Council of Canada

Preparing the Ground for Healthy Soil

Searching for a GREEN THUMB for your gardening success? It's all about healthy soil. Learn the simple steps to figure out your soil's current health and how to jump-start its improvement in easy, affordable and effective ways. It'll be fun, rewarding and great for our Planet, all at the same time.

Tuesday May 6th @ 7pm Eastern

(A Special presentation during International Compost Awareness Week 2025, May 4 – 10)

Presented by: Steven Biggs, www.FoodGardenLife.com

Grow More Veggies with Containers

Small Space? Challenging growing conditions? Containers are a great way to succeed in challenging spaces. In this talk, find out how to successfully grow crops in containers and learn how to choose the right containers.

More Sessions to be announced.

Please email info@compost.org to get on the list for further news.
