

Sustainable Communities

begin with

La fondation des collectivités durables

Communities form our common ground.
How we live together, our shared goals, values and interests.

Now more than ever, communities need to be built
on a foundation of sustainability,
recognizing the interconnectedness of all Life on Planet Earth.

Easier said than done.

But through one simple act – COMPOST! - so much can begin.

Recycling organics instead of throwing them in landfills
means less greenhouse gas in the atmosphere.

And using compost feeds the soil.

Our soils then do their part to provide healthier food,
cleaner water, richer biodiversity and a calmer climate.

Compost nurtures the very cycle of Life itself.

Thank you for doing your part.
