ORGANICS RECYCLING ACROSS CANADA: STATISTICS AND TRENDS

Maxime Gaudet

Statistics Canada

Results of Statistics Canada's national survey on composting and recycling facilities including households' composting habits will be the focus of this timely presentation, to be held as part of International Compost Awareness Week 2025.

Highlighted information will include assessments on organics recycling progress, survey content and recommendations, overview of available data, and households' attitudes and participation.

Please join us for this information-rich session which will showcase our industry's progress and help identify areas for improvement to reach Canada's goal of realizing the full benefits of prioritizing organics recycling and the return of valuable organic matter to our soils.

Wednesday May 7, 2025 - 1pm Eastern
